## Structural Steel Works

Salford Engineering Solutions undertake steel fabrication and structural steel projects for any conventional steel and pre-engineered building structures.

Whether creating new standalone structures or adding a structure to an existing traditional building such as an apartment block or a school, we offer you a comprehensive range of steelwork options.

We contract mainly for secondary steel packages, providing a turnkey design, manufacture and installation service. We are EN1090 accredited steelwork contractors.

## Plating & Sheet Metal Fabrication

Salford Engineering Solutions Ltd sheet metalwork section has an excellent reputation for great quality and workmanship, within the industry.

Sheet metal work manufactured in our workshop is available in a full range of materials including mild, stainless steel and aluminium. Our fabricated product range includes chutes, square to rounds, cones, hoppers and vessels.

## Platforms & Gantries

Salford Engineering Solutions Ltd specialises in the design and fabrication of custom platforms, stairways, catwalks and ladders using steel, aluminium, and stainless steel.

We evaluate operator safety factors in all of our platform designs to ensure complete customer satisfaction. Our platforms are built to meet building regulations and health and safety requirements.

## Balconies, Gates & Railings

We fabricate gates, fences, handrails and balustrade. All of our gates and railings are manufactured in accordance with current British Standards and specifically comply with Health and Safety requirements.

We supply and fit purpose-built, balconies, railings and gates for domestic, commercial and industrial buildings.

We work in partnerships with local councils on regeneration works throughout the North West.

# Steel Fabrication Specialists Based in Salford Serving the Whole of the UK

Salford Engineering Solutions has an excellent team of experienced and qualified mechanical engineers and electricians. We have the expertise to install everything from a single machine to a complete new plant. We are experienced in moving, installing and maintaining heavy industrial machinery and process plant, and carry out ancillary works such as pipe fitting and ducting within planned shutdown periods.

- Flour Mills • Chemical Plants • Breweries
- Distilleries • Cereal Plants • Pet food Processing

We provide planned maintenance tailored to meet the specific requirements of the client. Site and personnel safety are always at the heart of our operating procedures.

## Machine Relocation, Removal and Decommissioning

Our engineers are experienced in removing, relocating and decommissioning plant and machinery. We can be relied upon to meet agreed timescales, whilst ensuring that we minimise the disruption caused to your employees and production processes.

## Flour Mill Plant Installation & Maintenance Engineers

Our strong track record as machinery installation experts was achieved partly through our early years experience working in flour mills and food processing plants. We are now one of the leading food processing plant specialists in the North of England, providing a complete service from maintenance work to larger projects such as installing complete flour handling systems.

Our engineers are experienced in the specific requirements of this particular sector. We have strong, co operative relationships with many large flour mills, and have permanent teams in a number of them.

Our teams work in flour mills throughout the UK and have accumulated a vast bank of experience and technical knowledge. Our client list include: Cargill, Rank Hovis, Allied Mills and Nelstrop. We are primary UK installation contractors for Buhler and Satake.

# Testimonials:

*"We work alongside Salford Engineering Solutions on varying projects and always find them easy to work with, we believe they work to the same principles as ourselves. Conscientious of the Client's requirements in a competitive commercial environment, whilst having the experience and understanding for the complexities faced in construction projects."*

Matt Pimbley  
Graham Jones Associates Ltd  
Manchester

*"I would like to award a Green Card to the following operatives and as a collective: Andrew Charnley Smith, Chris Crowley, Jamie Maxwell, Remy Maxwell, Callum Ball.*

*The green card has been awarded for the removal of the jet zone conveyor. The process was assessed, planned and controlled in a professional manner from start to finish.*

*In particular Andrew who was in complete control of the task until completion, As an observer I felt very comfortable and would have confidence in allowing the collective group to undertake further machinery removal on site.*

Well Done Lads

Kind Regards  
Samuel Nicholas Hey"

Site Manager, Lorien Engineering Solutions
